

The Higher Diploma in Construction and the Built Environment

The Diploma in Construction and the Built Environment will enable you to learn how the built environment is designed and constructed, how it impacts on people and communities, and how history, politics and economics affect it.

You will develop a range of skills and knowledge needed in different industries - for example, using tools and understanding modern construction methods and materials.

You will learn how to analyse the need for good management and continuous maintenance, and understand the importance of good design, workmanship and teamwork.

As a Diploma student, you will develop skills, such as team-working, creative thinking and self-management that are vital skills in both life and work, and will be useful to you in the future, no matter which career route you take.

The Diploma will give you the opportunity to do at least 10 days work experience, and complete a Project to demonstrate a wide range of skills.

The Diploma is equivalent to 7 GCSE Grades A*-C and prepares you for both employment and further study, and could lead to a university degree. It is available at North Lindsey College.

Sounds good? Ask your teacher or careers adviser about the Diploma if you think it is right for you. If you want to find out more, go to:
